Explanation of the abbreviations used in the **Info** column:

- O** - Designates "open" repeater or system, available for all to use. Note that an "open" system may include a "closed" (e.g. members only) autopatch.
- C** - Designates "closed" repeater or system. [For more information about the "how and why" of closed systems, look at the Frequency Coordination FA](#)
- X** - Designates a "Wide Area Coverage" repeater. Typically, this repeater offers unusually wide coverage, usually due to its excellent location.
- A** - Designates that this repeater has an autopatch. [Note: Most autopatches are closed except to members of the supporting organization, even if the](#)
- Ca** - Designates an autopatch that is known to be "closed" (see above).
- Rb** - Designates "Remote Base" capability. This usually means that there is another radio on-site that can be remotely "steered" to other frequencies,
- Snp** - Shared — no protection. Designates a frequency that can be used for temporary and experimental repeaters. No protection is guaranteed from
- I** - Internet. Designates a repeater that can be linked to other repeaters, users, and systems using "Voice Over Internet Protocol" (VOIP). This includes
- P** - Portable. Designates a repeater which may be operated from different locations as required for emergencies and special events.
